

Essential oils Air Freshener Pad D Label

Use:

Essential oils Air Freshener Pad D is made with botanical extracted essential oils to aid aroma. It enhances odors by masking bad odors with botanical smells, deodorizing and freshening the air. It also enhances the properties of microorganism inhibition that cold air has on fresh produce when the cold air circulates inside the refrigerated trailer.

Ingredients:

Made of botanical extracted essential oils. The essential oils mix can be safely used to deodorize refrigerated trailers transporting food according to 21CFR182.20 and 21CFR172.515 of Federal regulations.

Directions:

Use 4 trifold baskets of essential oils pads per refrigerated trailer. Each basket has 3 essential oils pads inserted in it. Open the sealed packet, unfold the trifold basket and attach each of the two hooks the basket has to the suction grid of the reefer unit.

Warnings:

Hazard statements

On direct contact may cause eye and/or skin irritation.

Precautionary statements

Wear gloves, face mask and eye protection. Keep out of reach of children.
